

Marimend 7

Natural Oropharyngeal Ulcer Healing Spray

Suitable for Equine

Topical spray

Ingredients:

- Calendula officinalis Extract
- Glycyrrhiza glabra (licorice) Extract
- Propolis Extract

Oral cavity ulcers in horses can be caused by various reasons, including infectious agents, plants and chemical irritants, dental problems, etc., and make eating painful for the animal. For this reason, the animal has refused to eat, which leads to many unfortunate consequences, such as weight loss, lack of vitamins, weak immunity, reduction in the number and diversity of microorganisms in the digestive system, etc. Therefore, speeding up the healing of oral ulcers and lesions in horses is very important.

Mechanism of action:

Marimend 7 is a 100% natural spray that heals all kinds of wounds in the mouth, gums, tongue and throat in horses. This product is formulated based on the active ingredients of calendula officinalis, licorice and propolis extracts, which have extensive anti-inflammatory, antibacterial and antifungal properties. The mechanism of action of this product is in a way which by increasing epithelialization and angiogenesis, reducing inflammation, inhibiting free radicals and preventing the growth of microbes in the damaged area, it helps and speeds up the wound healing process. By protecting the wound or injury, Marimend 7 prevents further irritation and reduces the pain caused by the injury.

Marimend 7 is free of any drug toxicity and there are no synthetic chemicals, preservatives or antibiotics in its formulation. Therefore, it can be used in sensitive conditions such as pregnancy, milking, newborns and young animals, and even weak physical conditions.

Marimend 7 Indications:

- After scaling and tooth extraction
- ulcers caused by jaw and mouth surgery
