

# Immuno Echinamol

For veterinary use only  
100% herbal product

Improve immunity and respiratory health  
Solution for oral administration

## Mechanism of action

Immuno Echinamol contains natural plant extracts such as Echinacea and Thyme. The various components of plant extracts will enhance the beneficial effects of each other. Echinacea is antibacterial, antiseptic, antiviral, anti-inflammatory and stimulates the immune system. This plant stimulates cell-mediated immunity and improves immune function by increasing T lymphocytes, phagocytes, leukocytes function and increasing the synthesis of interferon.

Thyme is attributed with antioxidant, antiviral, antifungal and antimicrobial effects. This plant is mucolytic (expectorant), reduce the thickness of bronchial secretions thus increasing mucus flow that can be removed more easily. Thymol and carvacrol are active ingredients and these components have antibacterial and antifungal effects. They are effective in respiratory collapse and increase lung capacity. Immuno Echinamol will provide better vaccine efficiency and reduce the side effects of vaccination and secondary infections.

## Indications

- improve immunity
- Prevent respiratory diseases
- Increase appetite
- prevent mucus membrane dryness and irritation
- Reduce side effects of respiratory complex diseases
- Chronic respiratory disease (CRD)
- Mucolytic and expectorant
- Infectious Bronchitis, Influenza, Laryngotracheitis, Infectious Coryza and Pneumonia

## Recommended dose

Poultry: 250-500 ml/1000 L of drinking water  
Pets: 0.5 ml (10 drops) per kg of body weight daily

**Packing:** 30 & 250 ml

**Storage conditions:** keep in dry place at 25°C.

**Expiry date:** 2 years from production date
