

Hepamarin

100% Herbal Medicine to Enhance Liver Function

Suitable for Pet

Oral solution

Ingredients:

- Milk Thistle Extract (Silymarin)

The liver is an organ with different functions and has special importance in the health of dogs and cats. Blood detoxification, drug metabolism, storage of vitamins and glycogen, production of bile acids needed for the digestion process, and production of basic proteins for blood coagulation are among the functions of the liver. Due to the liver's role in most body functions, liver diseases can cause a wide range of clinical symptoms depending on the function they affect.

Mechanism of action:

Hepamarin is formulated based on the active compounds of milk thistle plant (silymarin). The milk thistle plant has been known for its high medicinal value since the past. Silymarin is the most important active ingredient in milk thistle. Milk thistle reduces liver enzymes such as ALT and AST in hepatic disorders. It also reduces serum creatinine levels in poisoned animals. Hepamarin protects the liver from damages caused by poisons, toxins, chemicals and free radicals through anti-toxic, anti-inflammatory and antioxidant properties of silymarin. Hepamarin is effective in the treatment of various liver diseases, fatty liver syndrome and chronic and acute hepatitis and prevents hepatic failure. Also, the use of Hepamarin helps to regenerate the liver tissue and reduce the liver load caused by the use of antibiotics. Hepamarin helps to increase the metabolism and digestion of lipids in the digestive system by increasing bile secretions and prevents liver damage caused by the use of high-calorie and fatty compounds in the animal's diet. In general, Hepamarin improves liver function and prevents and treats disorders and diseases of the liver and gall bladder in pets.

Hepamarin Indications:

- Helps to improve liver function
- Treatment of chronic, acute and infectious hepatitis and prevention of hepatic failure
- Treatment and prevention of fatty liver syndrome (hepatic cirrhosis)
- Cleansing, regeneration and detoxification of the liver
- Treatment of liver poisoning caused by drugs, toxins and mycotoxins
- Treatment of liver in diseases such as infectious hepatitis
- After taking antibiotics
- In case of cholangitis, gallstones and biliary disorders
- Protecting liver from free radical damages
- Congenital disorders such as portosystemic shunt
- Helping lipid metabolism in the body
- Stimulating bile secretion and as a result improving digestive activities and fatty acid catabolism
- Preventing liver damage caused by diseases such as Cushing's syndrome and diabetes mellitus
- Protecting the liver against leptospirosis and leishmaniasis
- Improving the symptoms of jaundice

Recommended dosage:

Pet: 0.5 ml (10 drops) per 10 kg of body weight

Companion birds: 1 to 3 drops per day

Storage Conditions:

Store in a cool and dry place at 25°C and away from direct sunlight.

Drug Interaction:

Compatible with all kinds of commonly used medicines, additives and vaccines.

Cautions:

Keep out of reach of children

In case of accidental eye contact, wash immediately with plenty of water

Packaging:

30 ml bottles

Expiration Date:

24 months from production date
