

## Sana Vera

**100% Natural Skin Wound Healing Spray**

**Suitable for Ruminants**

**Topical spray**

### **Ingredients:**

- Calendula officinalis Extract
- Aloe vera Extract
- Propolis Extract

Having a healthy skin is an indicator of the general health of the animal because the skin acts as the first line of defense against all kinds of pathogens. Another function of the skin is to moderate temperature and blood pressure. In case of damage to the skin, this defensive barrier is disrupted and all kinds of infections and diseases can affect the animal.

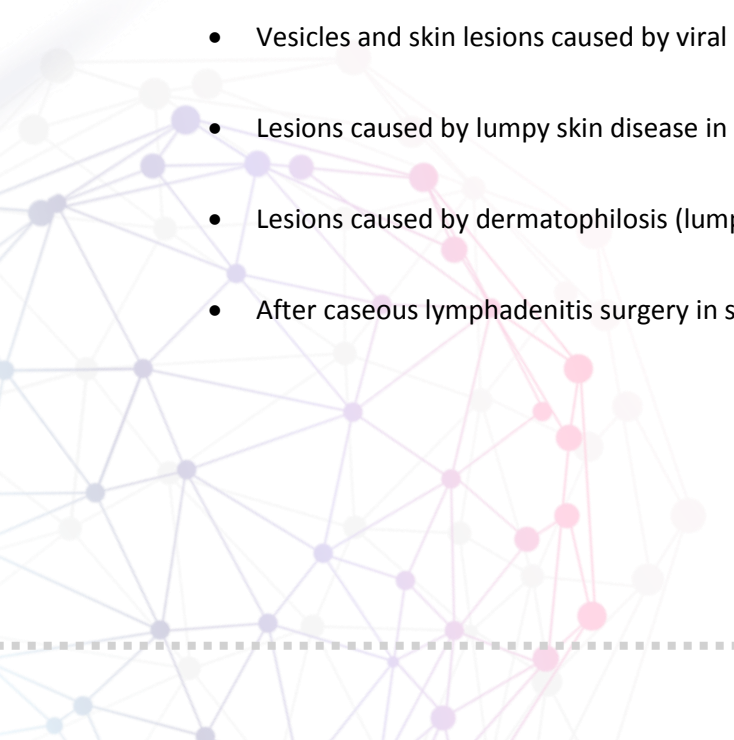

### Mechanism of action:

Sana Vera is a 100% natural spray that heals all kinds of wounds and skin inflammations in cattle, sheeps and goats. The main ingredients of this product include extracts of Calendula, Aloe vera and Propolis. These compounds have broad analgesic, anti-inflammatory, antibacterial, antifungal, and antioxidant properties, and by enhancing the immune system, stimulating collagen synthesis and increasing epithelialization, wound contraction, and forming granulation tissue, they speed up the wound healing process.

Calendula improves the wound by increasing collagen and elastin. Aloe vera with vitamins A, B1, B2, B6, C, E and folic acid stimulates tissue growth and cell regeneration. Compared to tetracycline, Propolis has faster effects in the improvement of lumpy skin disease in cattle.

Sana Vera does not contain any toxicity and its formulation does not contain any synthetic chemicals, preservatives or antibiotics. Therefore, it can be used in sensitive conditions like pregnancy, milking, newborns and young animals, and even weak physical conditions.
