

Lavar Ren

100% Herbal Medicine to Enhance Kidney Function

Suitable for Equine

Oral solution

Ingredients:

- Stinging Nettle (*Urtica dioica*) Extract

Kidneys play an important role in regulating blood pressure, removing waste products from the body, and maintaining electrolyte balance. Kidney diseases and disorders can be infectious or non-infectious. Urinary tract infections in horses are often caused by bacteria. Chronic kidney failure, urinary stones, poisoning with nephrotoxic compounds (such as aminoglycosides or tetracyclines, etc.) and poisoning with heavy metals (mercury, lead, arsenic, and gold) are all non-infectious disorders that can lead to kidney and urinary tract infection. In general, in kidney disorders and diseases, the removal of body waste materials is impaired and their levels in the blood increase dangerously, which is considered a serious threat to the animal's health. Therefore, maintaining and restoring kidney function is essential.

Mechanism of action:

Lavar Ren contains natural extract of nettle and is formulated in a way that its different components intensify and strengthen each other's therapeutic effects. The most important active ingredients in this medicine include phenolic compounds, quercetin, caffeoylmalic acid and chlorogenic acid. By increasing the volume and flow of urine, the active ingredients in Lavar Ren prevent retention of urine in the urinary tract and lead to the excretion of renal deposits and prevent the formation of kidney and bladder stones. The nettle in this product is very effective in reducing inflammation and infection of the urinary tract. Also, due to the high amounts of iron and vitamin C in nettle, it has antioxidant and anti-stress functions.

Nettle improves blood circulation, especially in the extremities of the body, and at the same time, it also causes the effective removal of toxins. Therefore, it is effective in protecting horses and ponies prone to laminitis. Due to its vitamin and mineral content, nettle also enhances iron absorption by the body and helps in the treatment of anemia. Consuming nettle has beneficial effects on the horse's microbial flora, and its herbal amino acids can play an important role in the formation of muscle tissue.

In general, Lavar Ren product improves kidney function, increases appetite and water consumption with a positive effect on kidneys and reducing renal load.

Lavar Ren Indications:

- Diuretic
- Improving acute and chronic nephritis and preventing renal failure
- Detoxification of drugs and chemicals (after the antibiotic therapy)
- Urinary tract disinfectant
- In cases of bacterial and viral infections (leptospirosis) which cause inflammation and necrosis of the kidneys.
- In cases of ascites syndrome
- Supportive treatment for reducing renal load
- After stresses such competitions

Recommended dosage:

250 ml per 5000 kg of body weight

Storage Conditions:

Store in a cool and dry place at 25°C and away from direct sunlight.

Drug Interaction:

Compatible with all kinds of commonly used medicines, additives and vaccines.

Cautions:

Keep out of reach of children

In case of accidental eye contact, wash immediately with plenty of water

Packaging:

250 ml bottles

Expiration Date:

24 months from production date
